

## THE NACHURS ADVANTAGE ON ALFALFA

- ▶ Maximizes carbohydrate reserves for top yields, quicker regrowth, and improved quality
- ▶ Increased relative feed values, crude protein, and total digestible nutrients
- ▶ Safe on plant foliage
- ▶ Tank mixes with insecticides and post-spray applications
- ▶ Optimizes plant health
- ▶ Non-corrosive on equipment and tanks
- ▶ Clean, easy handling

## GIVE YOUR ALFALFA THE NACHURS ADVANTAGE

quality in every drop™

# GO WITH THE LEADER NACHURS

- ▶ Highest quality liquid foliar fertilizer
- ▶ Quality, precision placement, and foliar safe
- ▶ Low impurities
- ▶ Low salt
- ▶ True solution N-P-K
- ▶ Orthophosphate (available phosphorus)
- ▶ Highly soluble

NACHURS liquid foliars have a neutral pH and are low in both salt index and impurities. These features of our liquid foliars enable the product to be sprayed on the plant foliage. Foliar feeding is one of the most efficient methods for supplying nutrients to a growing crop .

Applying available nutrients on the plant foliage allows for immediate absorption into the plant in a very short period of time. This immediate uptake promotes better plant health and increased yield potential.

NACHURS liquid foliars contain 80% - 100% of their phosphates in the available orthophosphate form. Orthophosphate is immediately available to the plant during the critical early stages of growth. Plants can only take up phosphorus in the orthophosphate form.

# GIVE YOUR ALFALFA CROP THE NACHURS ADVANTAGE

Alfalfa stores carbohydrates in the root system and the crown of the plant. A high level of carbohydrates promotes rapid regrowth after each cutting and endurance during winter months.

Foliar feeding with NACHURS liquid fertilizers provides available phosphorus and potassium to maximize carbohydrate reserves for improved yields, regrowth, and alfalfa quality.

NACHURS liquid fertilizers can also be tank mixed with insecticides and other post-spray applications to save money and time.

For maximum yields and early season plant performance, give your alfalfa crop **The NACHURS Advantage**.

- ▶ Maximizes carbohydrate reserves for top yields, quicker regrowth, and improved quality
- ▶ Increases relative feed values, crude protein, and total digestible nutrients
- ▶ Safe on plant foliage
- ▶ Tank mixes with insecticides and post-spray applications
- ▶ Optimizes plant health
- ▶ Non-corrosive on equipment and tanks
- ▶ Clean, easy handling

## Sales and Service

- ▶ Total solution to your foliar fertilizer needs
- ▶ Most experienced sales team in the industry
- ▶ In business for over 60 years
- ▶ Commitment to service is unmatched
- ▶ Our expertise in the areas of agronomy and application equipment sets us apart in the liquid fertilizer market
