

THE NACHURS ADVANTAGE

ON FRUITS, VEGETABLES, & NUTS

- ▶ Maximizes available phosphorus and soluble potash required for top yields and improved plant health
- ▶ Better flavor and longer shelf life
- ▶ Earlier to market potential, and better shipping quality
- ▶ Tank mixes with insecticides and post-spray applications
- ▶ Safe on plant foliage
- ▶ Uniform coverage
- ▶ Clean, easy handling, non-corrosive solutions

GIVE YOUR FRUITS, VEGETABLES, & NUTS

THE NACHURS

ADVANTAGE

NACHURS

quality in every drop™

GO WITH THE LEADER NACHURS

- ▶ Highest quality liquid foliar fertilizer
- ▶ Quality, precision placement, and foliar safe
- ▶ Low impurities
- ▶ Low salt
- ▶ True solution N-P-K
- ▶ Orthophosphate (available phosphorus)
- ▶ Highly soluble

NACHURS liquid foliars have a neutral pH and are low in both salt index and impurities. These features of our liquid foliars enable the product to be sprayed on the plant foliage. Foliar feeding is one of the most efficient methods for supplying nutrients to a growing crop .

Applying available nutrients on the plant foliage allows for immediate absorption into the plant in a very short period of time. This immediate uptake promotes better plant health, longer shelf life, and increased yield and profit potential.

NACHURS liquid foliars contain 80% - 100% of their phosphates in the available orthophosphate form. Plants absorb and metabolize phosphorus in the orthophosphate form making orthophosphate immediately available to the plant during critical growth stages.

GIVE YOUR FRUITS, VEGETABLES, & NUTS THE NACHURS ADVANTAGE

Fertility management is critical in producing high quality fruits and vegetables. As a quality, true solution liquid foliar fertilizer, NACHURS is recommended for foliar, transplant, and drip irrigation systems for all fruits, vegetables, and nuts.

NACHURS foliar fertilizers are clean, easy handling, and will not corrode application equipment or storage tanks, which save operators money and time. Foliar fertilization provides precise nutrient control to improve plant health and optimize yields.

NACHURS foliar fertilizers can be mixed with most pesticide programs for one-pass applications. Please contact your local authorized distributor, retailer, or agronomist for more information.

For maximum yields and maximum plant performance, give your fruit/vegetable/nut crop **The NACHURS Advantage**.

- ▶ Maximizes available phosphorus and soluble potash required for top yields and improved plant health
- ▶ Better flavor and longer shelf life of crops
- ▶ Earlier to market potential, and better shipping quality
- ▶ Tank mixes with insecticides and post-spray applications
- ▶ Safe on plant foliage
- ▶ Uniform coverage
- ▶ Clean, easy handling, non-corrosive solutions

Sales and Service

- ▶ Total solution to your foliar fertilizer needs
- ▶ Most experienced sales team in the industry
- ▶ In business for over 60 years
- ▶ Commitment to service is unmatched
- ▶ Our expertise in the areas of agronomy and application equipment sets us apart in the liquid fertilizer market
