

FOLIAR FEEDING SMALL WHITE BEAN PROGRAM

WHY YOU SHOULD FOLIAR FEED YOUR BEANS?

- Higher Yields
- Better Quality Beans
- Research Proves It's Profitable

WHY USE NACHURS FERTILIZERS?

Not all foliar fertilizers are created equal. NACHURS fertilizers are specially manufactured for foliar applications and have the following characteristics:

- Low Salt Index
- Immediately Available Nutrients
- Most Soluble NPK Available
- Chloride-Free
- Non-Corrosive
- Can Be Piggybacked With Most Fungicide/Pesticides

DID YOU KNOW THAT PLANTS HIGH IN P & K?

- Help Reduce Crop Stress
- Promote Better Fill & Pod Set
- Helps Stabilize Nitrogen

Phosphorus and potassium serve as growth, development, fruiting, and anti-stress agents to a growing bean crop. Beans are very sensitive to crop stress, which is why they need a good supply of available phosphorus and potassium for flowering fruit set and overall bean development. Beans cannot satisfy their nutrient needs from soil uptake alone for maximum yield. Foliar feeding with NACHURS fertilizer provides these critical nutrients during these key growth stages, which promotes better quality beans and higher bean yields.

FOLIAR BEAN PROGRAM:

- 1 gal NACHURS 3-18-18-1 per acre at 7" bush
- 2 gal NACHURS 3-18-18-1 per acre at 3% bloom

FOLIAR BEAN RESEARCH

Sunnyside, WA

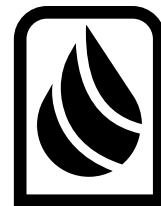

Applied: 1 gal NACHURS 3-18-18 at 7" bush
2 gals NACHURS 3-18-18 at 3% bloom

Replications: Four

RESULTS:

		Bags
Plot 1:	NACHURS Foliar Plot 1	30.3
	Untreated Plot 1	29.2
Plot 2:	NACHURS Foliar Plot 2	29.4
	Untreated Plot 2	28.3
Plot 3:	NACHURS Foliar Plot 3	29.5
	Untreated Plot 3	26.1
Plot 4:	NACHURS Foliar Plot 4	31.8
	Untreated Plot 4	30.2

Foliar Advantage: +1.8 Bags (Avg)
