

FOLIAR FEEDING BROCCOLI PROGRAM & RESEARCH

WHY YOU SHOULD FOLIAR FEED YOUR BROCCOLI?

- Higher Yields (More Boxes Per Acre)
- Larger Head Size
- Helps Increase Disease Resistance

WHY USE NACHURS?

Not all foliar fertilizers are created equal. NACHURS fertilizers are specially manufactured for foliar applications and have the following characteristics:

- Low Salt Index
- Immediately Available Nutrients
- Most Soluble NPK Available
- Non-Corrosive
- Can Be Piggybacked With Most Fungicide/Pesticides

DID YOU KNOW THAT PLANTS HIGH IN P & K?

- Help Reduce Crop Stress
- Promote Better Head Development
- Help Reduce Plant Diseases

Recent broccoli research indicate significant yield increases with using NACHURS highly soluble, P & K fertilizer program over no foliar fertilization alone. The above research indicates an increase of +47 boxes/acre, which translates to high economic returns to growers. The research also indicates that a greater application of potassium with NACHURS 3-18-18 could have a significant effect on head size. A high potassium fertilizer can have a major positive influence on yield and has shown to reduce plant diseases.

FOLIAR BROCCOLI PROGRAM:

- 2 gals/A of NACHURS 3-18-18 foliar applied 4 weeks prior to harvest
- 2 gals/A of NACHURS 3-18-18 foliar applied 3 weeks prior to harvest
- 2 gals/A of NACHURS 3-18-18 foliar applied 2 weeks prior to harvest
- 2 gals/A of NACHURS 3-18-18 foliar applied 1 weeks prior to harvest
