

# FOLIAR FEEDING CAULIFLOWER PROGRAM & RESEARCH

## WHY FOLIAR FEED YOUR CAULIFLOWER?

- Higher Yields (More Boxes Per Acre)
- Larger Head Size
- Helps Increase Disease Resistance
- Decreases Hollow Heart

## WHY USE NACHURS?

Not all foliar fertilizers are created equal. NACHURS fertilizers are specially manufactured for foliar applications and have the following characteristics:

- Low Salt Index
- Immediately Available Nutrients
- Most Soluble NPK Available
- Non-Corrosive
- Can Be Piggybacked With Most Fungicide/Pesticides

## DID YOU KNOW THAT PLANTS HIGH IN P & K?

- Help Reduce Crop Stress
- Promote Better Head Development
- Help Reduce Plant Diseases

Recent cauliflower research indicate significant yield increases with using NACHURS highly soluble, P & K fertilizer program over no foliar fertilization alone. The above research proved earlier maturity and greater uniformity on heads of cauliflower at harvest time on the NACHURS foliar plots. A decrease of hollow heart was also observed compared to the check.

## FOLIAR CAULIFLOWER PROGRAM:

- 1 gals/A of NACHURS 3-18-18 foliar applied with 40 gals. water immediately after thinning plants 6 inches tall with 3 leaves.
- 3 gals/A of NACHURS 3-18-18 foliar applied with 40-60 gals. water at the 1st stage of head formation.
