

# ONION FOLIAR PROGRAM

Improve your onion quality and yield with a proven onion foliar program.

## WHY YOU SHOULD FOLIAR FEED YOUR ONION CROP:

- Higher yields
- More uniform size
- Earlier harvest dates
- Improved storability

High producing onion crops respond well to a balanced P & K foliar program. A quality foliar program produces quality results. NACHURS foliar fertilizers are as safe on plant foliage as they are on spray equipment. Our fertilizers will not plug, clog, or corrode application equipment.

## ONION FOLIAR PROGRAM:

1. One gallon NACHURS 3-18-18 foliar applied in early June
2. Three gallons NACHURS 3-18-18 foliar applied in late June

## BURLEY, ID RESEARCH:

Plot 1: Applied 1 Gal. NACHURS 3-18-18 June 7  
Foliar Applied 5" Band  
4 Reps (8 Rows x 10 foot)

Plot 2: Applied 3 Gal. NACHURS 3-18-18 June 21  
Foliar Applied 15" Band  
4 Reps (8 Rows x 10 foot)

## RESEARCH RESULTS:

Foliar (Avg of 2 Plots)  
38.7 Tons/A

Check  
36.5 Tons/A

**NACHURS Foliar Advantage: +2.2 Tons/A**
