

FOLIAR FEEDING PEPPER PROGRAM & RESEARCH

WHY YOU SHOULD FOLIAR FEED YOUR PEPPERS?

- Higher Pepper Yields
- Increased Pepper Size
- Earlier To Market
- Higher Returns On Pepper Investment

WHY USE NACHURS?

Not all foliar fertilizers are created equal. NACHURS fertilizers are specially manufactured for foliar applications and have the following characteristics:

- Low Salt Index
- Immediately Available Nutrients
- Most Soluble NPK Available
- Non-Corrosive
- Can Be Piggybacked With Most Fungicide/Pesticides

DID YOU KNOW THAT PLANTS HIGH IN P & K?

- Help Reduce Crop Stress
- Promote Better Pepper Development
- Improves Overall Plant Health

RESEARCH INFORMATION: The NACHURS foliar plots showed a 32.2 percent increase over the untreated check with a higher percent in the extra large and jumbo size peppers. The total of medium, large, extra large, and jumbo sizes showed a 13% increase in the larger size peppers.

Earlier to market and larger size peppers bring the grower the highest prices and greatest return per acre.

FOLIAR PEPPER PROGRAM:

- 1 gal/A with 20 gals. water foliar applied 2 weeks after transplant after initial transplant wilt
- 3 gals/A with 40 gals. water foliar applied at first bloom (3-4 wks after 1st application)
- 3 gals/A with 40 gals. water foliar applied at early fruit set (4-6 wks after 2nd application)
