

ELITE DRY IMPREGNATION SYSTEM FOR YARAVITA® PROCOTE®

NACHURS®

NTEP-Approved Option • Integrated Metering Pump • Tower & Floor Blender Compatible • Variable Rate • High PSI

STORE TOTE ALONGSIDE BLENDER

For outdoor scenarios, maintain temperatures above 70 degrees with an MEI supplied immersion heater and/or insulation jacket. The Outdoor Kit also includes an air agitator to speed up heating process and ensure product temperature consistency.

PRODUCT FLOW & INVENTORY CONTROL

Automate product flow including positive shutoff & manual overrides for optimal product blends and inventory accountability.

FLOOR & TOWER BLENDER COMPATIBLE

With pressures of up to 200 PSI, this system is compatible with both horizontal and vertical blenders for both floor and tower applications.

SHEARING PREVENTION

Eccentric hydraulic positive displacement pump maintains high speeds without the use of impellers to provide for repetitive delivery rates.

PRECISE & ACCURATE BATCHING

User-friendly electronic control panel makes it easy to inject YaraVita® PROCOTE® with precision and accuracy. It also can be integrated with ANY existing automation system.

HIGH SPEED & VARIABLE RATE

Achieve maximum volume of 4 quarts per ton in less than a minute without compromising the integrity of YaraVita® PROCOTE®. Speed can be varied as needed.

INTEGRATED METERING PUMP

This system includes a highly accurate integrated metering pump. For scenarios where NTEP-approval is required, a scale can be easily added to the system.

Liquid Handling Systems & Automation

We know equipment. It's in our name! For over 60 years, Murray Equipment has been providing liquid handling equipment to fertilizer and crop chemical manufacturers and retailers. Be confident you are using the best equipment for the application. Choose Murray Equipment.

DRY IMPREGNATION SYSTEM FOR YARAVITA® PROCOTE®

NACHURS®

NTEP-Approved Option • Floor Blender Compatible • Single Rate • Standard PSI

STORE TOTE ALONGSIDE BLENDER

For outdoor scenarios, maintain temperatures above 70 degrees with an MEI supplied immersion heater and/or insulation jacket. The Outdoor Kit also includes an air agitator to speed up heating process and ensure product temperature consistency.

NTEP-APPROVED OPTION (SHOWN)

Retail ready, this system can measure using a NTEP-approved scale and intelligent indicator (as shown).

PRECISE & ACCURATE BATCHING

Simple control panel combined with the intelligent scale indicator makes it easy to inject YaraVita® PROCOTE® with precision and accuracy. It also can be integrated with ANY existing automation system.

PRODUCT FLOW & INVENTORY CONTROL

Automate product flow including positive shutoff & manual overrides for optimal product blends and inventory accountability.

HIGH SPEED

Achieve maximum volume of 4 quarts per ton in less than a minute without compromising the integrity of YaraVita® PROCOTE®.

FLOOR BLENDER COMPATIBLE

With pressures of up to 60 PSI, this system is compatible with both horizontal and vertical blenders. Need a solution for a tower? Ask about our Elite System.

SHEARING PREVENTION

Air-driven diaphragm pump maintains high speeds without the use of impellers to provide for repetitive delivery rates.
